Art Unit: 3781

1. The drawings are objected to:

a) The drawings must be labeled by numerals and must be discussed in detail in the specification.

b) The drawings filed 05/18/05 has new matter, i.e., the original disclosure does not teach the handle as shown in Fig. 2 with the handle is a part of the bottle structure.

The specification is objected to:

Applicant to note the format for describing the figures the Brief Description of the Drawings. Please note the format in US 5664671.

Applicant to provide numerals in the figures and discussed in detail in the specification.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claim is narrative in form and replete with indefinite and functional or operational language. The structure which goes to make up the device must be clearly and positively specified. The structure must be organized and correlated in such a manner as to present a complete operative device. The claim must be in one sentence form only. Note the format of the claims in the patents cited.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 and 35 U.S.C. 103(a) that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 1 is rejected under 35 U.S.C. 102 (b) as being anticipated by Morse (55341), or Newton (193025), or Wynn (1615319), or Degraff-Eugene (5673789), or Ader (378752). Each of the above references teaches a bottle with a compartment that can be used to store items safely as claimed.

6. To the degree applicant to claim a handle, claim 1 are rejected under 35 U.S.C. 103(a) as being unpatentable over the rejections as set forth in paragraph 3, and further in view of Smalley (601988). It would have been obvious to one of ordinary skill in the art to provide a handle as taught by Smalley to enable one to transport the bottle safely.
